

Contribute

Users can add new posts to Wide Narrow containing different types of information (text, files, links, and images) by using the function Contribute.

To open the contribution form without uploading any content click **Continue**.

The simple contribution form (optional)

The simple contribution form can be activated/deactivated on the My profile page.

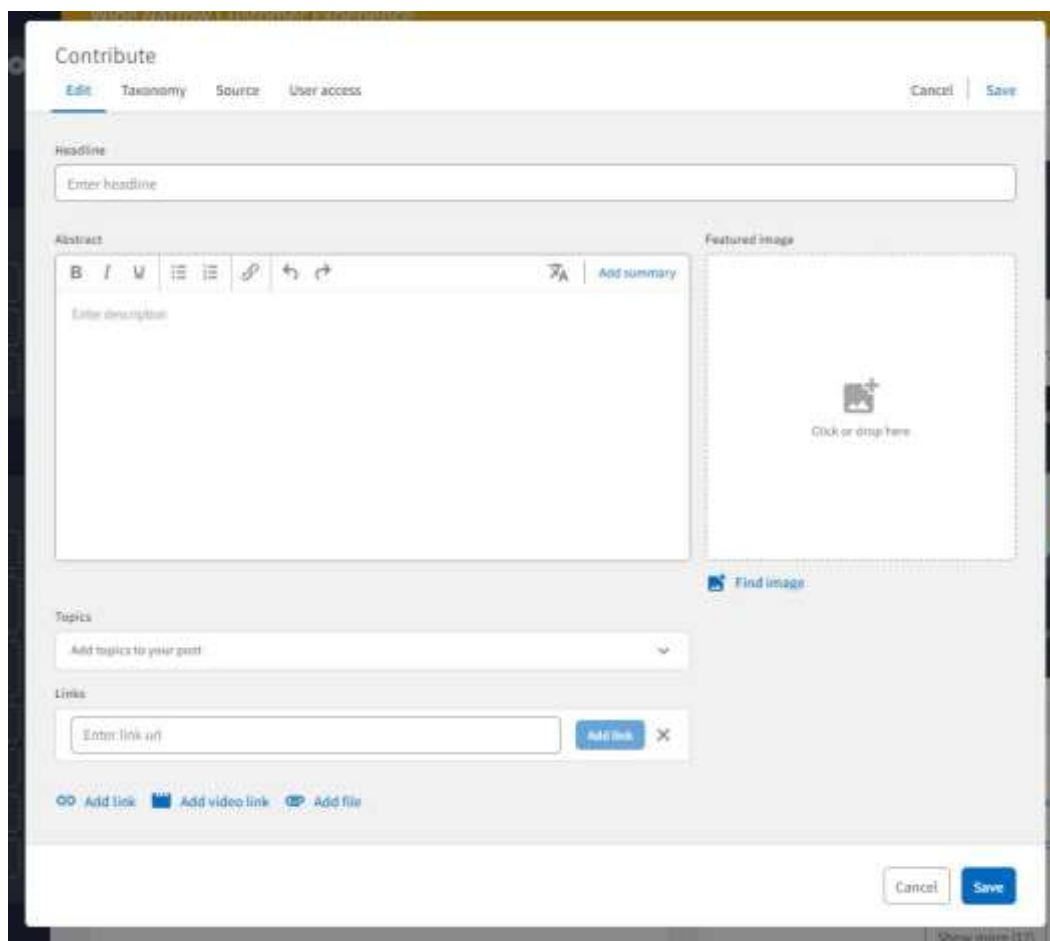

Click the Profile icon on the upper right of the page, click edit and then switch the toggle to activate the Simple contribute form.

The Simple Contribute form supports automatic upload to the contribute form:

1. *Enter a link*
Paste an article link. Wide Narrow will fetch and upload the article content if possible.
2. *Enter a title*
Wide narrow will automatically add the title text.
3. *Drop Image*
Wide Narrow uploads the image to the post.
4. *Drop file*
Wide Narrow uploads the file to the post.

The contribute form

To open the Contribute form without uploading any content click **Continue** and start with a blank form.

The screenshot shows the 'Contribute' form interface. At the top, there are tabs for 'Edit', 'Taxonomy', 'Source', and 'User access', along with 'Cancel' and 'Save' buttons. The form is divided into several sections: 'Headline' with a text input field labeled 'Enter headline'; 'Abstract' with a rich text editor containing a toolbar (bold, italic, underline, list, link, unlink, undo, redo) and a text area labeled 'Enter description'; 'Featured image' with a large placeholder box labeled 'Click or drop here' and a 'Find image' button below it; 'Topics' with a dropdown menu labeled 'Add topics to your post'; and 'Links' with a text input field labeled 'Enter link url' and an 'Add link' button. At the bottom, there are buttons for 'Add link', 'Add video link', and 'Add file', along with 'Cancel' and 'Save' buttons. A 'Show more (17)' link is visible at the bottom right.

1. Add a title and description. The description text can be styled and translated.
2. Upload images to the image dropzone or click Find image to find an image in the in-app image library. Position the image left, right, under or over text.
3. Add links, files or video links. You can add several links to a post.
Article text will be available on a post after a link has been extracted.
4. Open the Taxonomy to add topics to your post
5. Click User Access to restrict access to the post.
6. Click Save to save the Contribution.
